Do.

The Revenue Secretary
to the Govt: of Mysore.

Sir,

With reference to the officiating Chief Secretary's docket No. 1853 (8) dated 24th April 1895 requesting that Rs. 3,682 the amount of acreage contribution due on the lands under the Ramasandra Dank Sidlaghatta Taluq may be determined and reported with a detailed statement showing the rate of contribution, arrears &c. I have the honor to submit herewith for information copies of two detailed statements as per margin* showing the revenue derivable from and the acreage contribution leviable on the lands irrigable from the Right Bank Channel of the Dank together with the approximate amount of the sale proceeds of unoccupied lands to be disposed of by public auction.

2 It will be observed from the figures that the revenue derivable from all the occupied and unoccupied lands to be commanded by the Channel is estimated at Rs 501 the amount of acreage contribution leviable according to rates on occupied dry lands convertible into wet at Rs 90/- and the amount

*1. Statement showing the Extents of lands of all descriptions which will be brought under wet cultivation.

2. Statement showing the approximate yearly revenue derivable in the shape of assessment from the occupied and unoccupied lands which will be irrigated from the Dank.

Memo.

I had about 40 reports belonging
to (1) Kimmena taluq (2) Somesvara
(3) Vaccavatana taluq (4)
and (5) Somenahalli before
me this day. On explaining to them
explanation they circulated report
& pay contribution by collecting
the water of the Ramatirtha
tank. Reply received that
that Somenahalli villagers have
consented to pay contribution at
Rs 2-5-0 and 1-5-0 for dry and wet
land respectively. This village
is situated immediately below
the tank and its water has already
been used by the people of this
village for irrigation purposes.
If no time has been given them
for the payment of the contribution
amount immediate steps should
be taken to recover the same.
I understand no channel
is necessary for the irrigation
of the village as it is convenient

& the water will be clear

Then the question of
conservation and supply of
water from the new sources
is next to be settled for so
as far as the villages
Baramahal is concerned.

Govt will give every
facility & the said villagers
have sufficient quantity of
water for irrigation, purposes
here.

As regards the other
villages named above
which are situated on the
Cauvery River will
have either to give up all idea
of excavating a channel
in the right bank of the River
- Cauvery but to so as to
prevent the said villagers
from taking advantage of
it by either giving up entirely
utilizing the water for irri-
- gation, purposes. When
channel is dug it is diffi-
- cult & expensive to close
supervision over the distri-
- bution of water so as to

any clandestine use of the same for in the majority of cases it generally meets with the connivance of the village officials, to secure becomes inoperative, I would in these circumstances strongly recommend that the channel work on the left bank should not be commenced unless and until the rights in question voluntarily come forward & pay up contribution, which I am confident they will do as soon as they become cognizant of the benefit that is derived by the villagers on the right bank of the river & time should therefore be lost & take in hand the excavation of the right bank channel.

If however there is any difficulty & commencement work by any alternative left for Government is to enhance the existing rate of assessment on wet lands on the left bank. The total

Area of wet land in the above named five villages is 53 acres and 28 guntas, having an assessment of Rs. 1603/2/- exclusive of 24 acres and 4 guntas of garden land assessed at Rs. 493/2/-. The former land at an average rate of Rs. 3 per acre would yield about Rs. 1,553/-/- as the annual assessment, which is exceeded by a sum of Rs. 1,603/2/- and above the present revenue which I must admit is a ridiculously small return for the large outlay incurred by Government for the construction of the tank.

Sub division officers will be requested to inflict exemplary punishment in the shape of fine on the recalcitrant ryots who may clandestinely utilize the water of the Ramanagara tank, by reporting every one of such cases for the information of the Deputy Commissioner.

As will also be found
& submit a list of lands
with necessary particulars
given out on temporary allo
-cation. In my opinion
such grants should at once
be cancelled and the lands
leased for sale after the
completion of the channel.
The executive Engineer
will be requested to take
early steps to survey the project
basic channel when cash be
data, delay means loss
of so much revenue & increase
-ment.

Explanation

The above statement gives 930 Acres 34 Gunthas as the total area irrigable from the Channel of the Lawrence Canal.

This is made up as follows:—

(1) Occupied area —

	Acres	G.
Dry —	465	-
Wet —	67	15
Garden —	44	-
	576	25

(2) Unoccupied assessed waste — 354 - 34

(3) Unassessed Kharab land — 2 - 2

930 - 34

The Expected revenue is calculated as follows:—

(1) From acreage contribution on 465 acres of Dry at rates fixed — 2085 - 2 - 0

(2) From the rate fixed on Wet land 1921/2 acres — 711 - 4 - 0

2796 - 6 - 0
